

I'M A SEA TURTLE

A Voice From The Ocean

My Sea Turtle Story ✨

Hello everyone, Today, I am not just a student.
I am a sea turtle... a small creature living in the vast blue ocean.

Every day, I swim through **endless waves**, under the **warm sunlight** that shines through the water.

I see **colorful coral reefs**, schools of fish dancing around me,
and a **world that is both beautiful and mysterious**.

But behind this beauty, **there is a hidden danger...**

My home is **slowly changing**. The ocean is no longer as clean and safe as it used to be.
Every journey I take is now filled with risks.

Today, I am here to tell you my story...
and to **share messages that comes from the heart of the ocean.**

I AM A SEA TURTLE - My STORY

I often see plastic bags floating silently in the water, moving gently with the waves. They look so much like jellyfish, my favorite food, that I cannot tell the difference. Sometimes, I eat them by mistake... and then I feel a deep pain inside my body. I become weak and tired, and it is hard for me to swim.

The ocean is not as safe as it used to be. Many of my friends get trapped in fishing nets left behind by humans. They struggle and struggle, but they cannot escape. Some of them never come back...

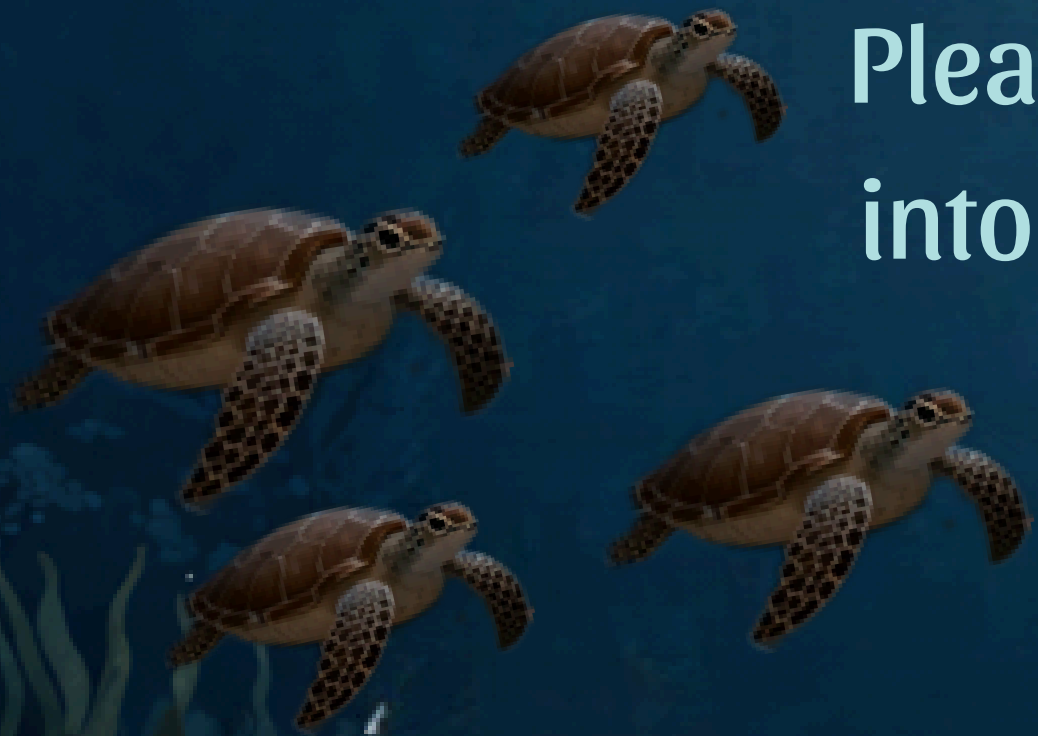

When I return to the beach to lay my eggs, I feel worried. The sand is no longer clean. It is covered with trash, plastic bottles, and harmful waste. It is not a safe place for my babies to grow. I am afraid that when they hatch, they will face the same dangers as I do.

Every day, I try to survive... but the ocean is becoming more and more dangerous for creatures like me.

My MESSAGE TO YOU:

Please protect our oceans and our planet by not throwing trash into the sea and by using less plastic in your daily life. Keep our beaches clean and safe for all living creatures.

If you help protect us, we can continue to live, grow, and keep the ocean beautiful for everyone.

Thank you!
