Answers 1 - 7

**Section 1 :
Properties of Plastics**

**Section 2 :
Recycling Plastics**

**Now, let's get on to
my plastic footprint!**

Item Name	Plastic Type	Number used each week	Weight/item or 10 items (g or kg)	Can this item be recycled?	Time needed to decompose
Plastic cup	PP ▾	7	14g/item (98g per week)	Yes	25 years
Plastic lid	PET ▾	7	5g/item (35g per week)	Yes	7 years
Plastic bottle	PET ▾	7	22g/item (154g per week)	Yes	7 years

Person per week : 508 grams

Person per month : 2 032 grams

Family per month : 6 096 grams

The total weight of plastic we use in a month is even greater than the weight of a bird!

"It is the worst of times but it is
the best of times, because we
still have a chance."

— Sylvia Earle

**Our next part is...
living green!**

Let's get started!

Your name: _____

Your class: _____

Living Green at Home and at School

The best place to start being green is in your own house and at school. Your behavior and the choices you make can have a big effect on our environment.

Living an Eco-friendly Life

Think about activities that you are doing at home now. Do research for more eco-friendly ways to do these activities and write in the table below.

What you are doing now	Ways to be more eco-friendly	Sources that I used in my search
When you're at home		
I'm using Scrap paper, draw it on one side only and throw them away.	Draw on both sides on the paper. Reuse scrap paper.	the art of simple
When getting from one place to another		
My little sister throw trash away while she was on the car	Put the trash into a bag	nemours Kidsthealth

When you're eating		
My friend eats half of a banana then she throw it away	if you eat it, you have to eat the WHOLE thing	Nemours Kidsthealth
When you're shopping		
A stranger throws trash onto a chair	Put them into the trashcan	Nemours Kidsthealth
When you're at school		
I'm using plastic bottles, paper rolls, ... draw on them and throw them into the trash.	Turn the plastic bottles, paper rolls, ... into useful object that we can use it more often.	VINSCHOOL

Conclusion

My presentation is all about plastic and eco-living.

Thank you!
